Origin 600 mid-range ADCP

The Origin 600 Acoustic Doppler Current Profiler (ADCP) enhances Sonardyne’s range of acoustic instrumentation by bringing a versatile, reliable, easy-to-use and cost-effective device to market. Combining field proven transducers with an integrated modem, internal rechargeable battery and advanced software, this device expands ADCP capability for users requiring mid-range current profiles from moderately shallow sites.

Origin 600 has a five-beam configuration, with a central vertical beam. This geometry, paired with a maximum sampling frequency of 4Hz on all beams, is suitable for waves and turbulence applications, as well as mean currents.

Origin 600 possesses power efficient electronics that, combined with its 55 Ah internal rechargeable battery, allow for deployments of three months and more depending on measurement schedule. A dual battery allows for even longer or energy demanding deployments. This long battery life reduces the need for risky and costly device retrieval. External power can be supplied by PoE, allowing the user to program the device and download data without a separate power supply, though this is also supported.

Origin 600 delivers conventional PDO data as standard, whilst optionally logging proprietary formats with up to ten times greater spatial resolution than PDO. These allow users to probe certain structures in the velocity and backscatter intensity data at an order of magnitude finer detail than previously possible. Data is logged to the onboard storage unit with 1 TB capacity as standard, and can be streamed via Ethernet for cabled deployments. To add further value to the ADCP data, external sensors can be integrated via RS232 and their data logged on the ADCP.

A suite of intuitive software tools are available for Origin 600. Schedules can be configured using the Origin Scheduler PC application, enabling operations to be de-risked prior to deployment. The Origin Portal Web UI facilitates device configuration in operational conditions, including modification of the sampling schedule. Two schedules can be run together, allowing dual monitoring tasks to be performed with a single device. File data can be inspected using the Origin Viewer software package.

An MF acoustic modem is integrated as standard and facilitates remote actions using an accompanying topside modem (sold separately) and the Origin Topside PC software. This enables data inspection and QC, battery and storage checks, schedule reconfiguration, and data offload; all

core features of the ADCP can be accessed acoustically once deployed.

Origin 600 is compatible with the Sonardyne Edge computing environment. This permits users to upload processing apps to Origin 600 that optimise the data for their specific application. Apps can be uploaded via Origin Portal or Topside and resulting data exported over the acoustic modem, supporting post-capture data harvesting and near real-time topside monitoring.

Finally, Origin 600 is compatible with standard mounting infrastructure, reducing risk and cost for upgrading to this device.

Key Features

- Class leading 600 kHz ADCP
- Reliable and robust acoustic design using field proven transducers
- Integrated acoustic modem
- Rechargeable battery
- Configuration via Origin Scheduler, Portal Web UI and Topside
- Minimum cell size of 12 mm
- 1.2 to 50 m profiling range
- 150 m operational depth rating
- Up to 4 Hz ping rate on 5 beams
- Compatible with Sonardyne Edge computing environment

Specifications

Origin 600 mid-range ADCP

Single battery

Dual battery

Features		Type 8382 (-0457 single battery; -0427 dual battery)
ADCP	Operating frequency	625 kHz
	Maximum profiling range	Up to 50 m (depending on water environment)
	Minimum cell size	12 mm
	Minimum blanking distance	1.2 m
	Velocity range (along beam)	Up to ± 2 m/s or 3.75 m/s user selectable
	Velocity RMS	0.5% of measured value
	Maximum number of cells	2500
	Maximum ping rate	4 Hz (5 beams)
Acoustic modem	Beam width/angle	± 1 degrees / 25 degrees
	Operating frequency	MF (20–34 kHz)
Sensors	Typical operating range	500 m
	Temperature	-5° to 40°C
	Heading accuracy/resolution	$\pm 1^\circ/0.1^\circ$
	Pitch & roll accuracy/resolution & range	$\pm 1^\circ/0.1^\circ$ & $\pm 90^\circ$ (pitch), $\pm 180^\circ$ (roll)
Communication and logging	Pressure	$\pm 0.01\%$ full scale
	Communications	RS232, Ethernet and acoustic modem
Output	Internal logging	1 TB internal memory
	Output telegrams	PD0, A-gram, and B-gram; simultaneous output
Electrical	External power	18–48V power by external cable; PoE+, adapter included
	Power	15 mW (sleep), 600 mW (pinging), 3.5 W (fully active)
	Internal battery capacity	55 Ah rechargeable (dual battery available); charger included
	Internal battery recharge	4 hours fast-charge (8 hours for dual battery)
	Full/scheduled/standby lifespan ¹	1 week/3 months/2 years
Environmental	Depth rating	300 m survivable/150 m operational
	Operating/storage temperature	-5 to 55°C/-20 to 55°C
Mechanical	Construction	Plastic
	Connector type	Subconn: 8-way for power and comms; 6-way for fast-charge
	Dimensions (height x max diameter)	308 x 290 mm (dual battery height 388 mm)
	Weight in air/water ²	19.2/7.2 kg (dual battery 23.9/7.9 kg)
Software	Origin Portal	Embedded Web UI for control & configuration
	Origin Scheduler	Schedule planning & configuration tool
	Origin Viewer	File data inspection
	Origin Topside	Remote configuration & control over acoustic modem

¹ Lifespan with single battery calculated with 4 Hz continuous pinging (full), 4 Hz for 1 min & sleep for 14 min (scheduled), no pinging (standby).

² Estimated weights.
